

MUBASHIR FAYYAZ

INFORMATION TECHNOLOGY INTERN

0328 8800818 | 1255mubashir@gmail.com | github.com/mubashir1255 | Pakistan

PROFILE

BS Information Technology student with hands-on experience across software development, databases, cloud infrastructure, Linux, virtualization, containers, and cybersecurity labs. Built AI, web, robotics, and electronics projects and currently designing AgroBid Pakistan, a digital agricultural auction platform. Seeking an internship where strong problem-solving, technical curiosity, and practical project experience can contribute to a real engineering or IT team.

TECHNICAL SKILLS

Programming & Web	Python; HTML; CSS; JavaScript
Databases	MySQL; MySQL Workbench; relational database fundamentals
Cloud & DevOps	Cloud virtual-machine instances; Docker; Git; GitHub
Systems & Virtualization	Linux (Ubuntu, Kali Linux); VMware; command line; virtual machine setup
Cybersecurity Labs	Nmap; Zenmap; Metasploit Framework; Metasploitable 2; controlled vulnerability-testing environments
Productivity	Microsoft Word; Excel; PowerPoint

SELECTED PROJECTS

AgroBid Pakistan - Final Year Project | *Web application | MySQL | Real-time auction concept*

- Designing an agriculture-focused marketplace where farmers can publish crop listings and buyers can participate in transparent auctions.
- Defined farmer, buyer, and administrator workflows covering listings, search, bidding history, notifications, profiles, ratings, chat, and platform moderation.

AI Animal Classifier | *Python | Machine learning | Image classification*

- Developed an image-classification project that applies a trained model to identify animal categories, gaining practical exposure to data preparation, model use, and prediction workflows.

Maze-Solving Robot & Metal Detector | *Embedded systems | Sensors | Control logic*

- Built hardware prototypes that used sensor input and programmed decision logic for autonomous maze navigation and metal detection.

Portfolio Website & Calculator | *HTML | CSS | JavaScript*

- Created browser-based projects to practice responsive page structure, styling, DOM interaction, and JavaScript event handling.

PRACTICAL IT EXPERIENCE

- Provisioned and managed cloud virtual-machine instances and practiced basic infrastructure configuration.
- Created Ubuntu and Kali Linux virtual machines in VMware; installed tools, used the Linux command line, and maintained isolated lab environments.
- Used Docker for container fundamentals and Git/GitHub for source control, repository management, and project sharing.
- Performed authorized security-lab exercises using Nmap, Zenmap, and Metasploit Framework against Metasploitable 2.

EDUCATION

Bachelor of Science in Information Technology (BSIT) | University of Lahore | Expected September 2027

CORE STRENGTHS

Problem-solving | Technical learning agility | Teamwork | Written communication | Initiative | Adaptability
